

使用Helm部署 dashboard

kubernetes-dashboard.yaml:

```
image:
  repository: k8s.gcr.io/kubernetes-dashboard-amd64
  tag: v1.10.1
ingress:
  enabled: true
  hosts:
    - k8s.frognew.com
  annotations:
    nginx.ingress.kubernetes.io/ssl-redirect: "true"
    nginx.ingress.kubernetes.io/backend-protocol: "HTTPS"
  tls:
    - secretName: frognew-com-tls-secret
      hosts:
        - k8s.frognew.com
rbac:
  clusterAdminRole: true
```

```
helm install stable/kubernetes-dashboard \
-n kubernetes-dashboard \
--namespace kube-system \
-f kubernetes-dashboard.yaml
```

[illegible]

```
kubectl edit svc kubernetes-dashboard -n kube-system  
修改 ClusterIP 为 NodePort
```
